

Discovery Quest

30th March - 1st April

L.Q. How can we use line and tone to represent objects in 3D?

Van Gogh famously painted a scene of his bedroom (see below). He had to think about perspective, line and tone to create this image as well as drawing 3D shapes.

I would like you all to have a go at recreating the bedroom scene, drawing a picture of your own bedroom. Use 3D shapes and use the knowledge you already have of colour representing mood to colour your picture in.

Here is a link below giving a brief tutorial of 3D drawing.
