

Regular science monitoring carried out by subject leader with feedback given to staff.

A subject leader report is sent to governors at the end of each school year.

We have an agreed format for recording investigations at an appropriate level for each year group. Pupils take part in one investigation per topic.

Subject leader meets with science co-ordinators from other 2 schools termly as part of our triad monitoring process and to share good practice.

Skills ladders are in place for all year groups.

Science at Little Bloxwich

Assemblies inspire workshops, mix-up lessons and class trips often have a science theme.

Science Day
Wednesday 11th
March 2020.

What does it look like?

The theme was 'Our Diverse Planet'

Hall display allocated to celebrate children's work for Science day.

2019 -2020 Trialling text base ready-made assessment tools introduced.

Vocabulary and definitions are taught for each unit. Scientific vocabulary has been put on our network in the science folder for each unit.

We have a well-resourced and organised Science area for year group topics. Budget of £1000 spent to update resources in March 2020.

Display in main entrance area January 2020 of mix-up afternoon work linked to climate change. This was linked to R.E. and our School Mission and 4Cs.

There was a meeting with the governor for science in January 2020 to share up to date information about this subject.

Practical based learning combined with age appropriate recording in each year group.
